

OVERVIEW OF AIDS UNDER COMPLETA TOP, COMPLETA FORTE, SUPPLEMENTA AND OPTIMA SUPPLEMENTARY INSURANCE.

Benefits defined in the GIC/SC

BENEFITS

- › SWICA covers the cost of the aids listed below, provided that they are used for treating illnesses or the consequences of accidents.
- › Costs are covered only if the aid has been medically prescribed.
- › SWICA determines its participation in the cost of aids based on their efficacy, appropriateness and cost-effectiveness.
- › Under COMPLETA TOP or COMPLETA FORTE SWICA covers 90% of the cost, up to 200 francs per calendar year.
- › Under SUPPLEMENTA, SWICA covers 90% of the cost, up to 500 francs per calendar year.
- › Under OPTIMA, SWICA covers 90% of the cost, up to 300 francs per calendar year.
- › The percentage of the cost covered is calculated to complement other supplementary insurance plans.
- › These supplementary benefits are paid only in the absence of cover under social or private insurance, in particular old-age and survivors' insurance (AHV), disability insurance (IV), military insurance (MV) or accident insurance (UV). If any of these insurance schemes pay benefits, no benefits under SWICA's supplementary insurance plans are due unless such amounts are expressly specified in the list below.
- › Repair and maintenance costs as well as consumables are included in the purchase/rental price and are not covered separately.
- › In addition to the aids listed, for any medically prescribed aids that are partially covered by mandatory health insurance, the supplementary insurance plans will pay the excess portion of the costs up to the maximum amounts specified in the relevant supplementary insurance plans.

AIDS RECOGNISED BY SWICA
