

DERMATOLOGY

IDENTIFYING SKIN CHANGES AT AN EARLY STAGE.

The skin is the largest organ in our body, and can be irritated and damaged by both UV radiation and work-related factors. For this reason, it's advisable to get your skin checked regularly. SWICA offers three modules as part of a dermatology campaign.

DERMATOLOGY CAMPAIGN

Target group

- › All employees
- › Main focus: professional groups with high exposure to the sun

Objectives

- › Making employees aware of how important it is to protect their skin.
- › Detecting skin changes at an early stage.

Content

- › Dermatology check-up on the premises (focusing on sun-related skin changes)
- › Digital skin check-up with online doctor
- › Presentation or webinar

Method

- › Physical examination and individual consultation
- › Digital skin check-up with report
- › Presentation or webinar

Carried out by

- › Dermatological specialist
- › Medical practice assistant or certified nurse
- › This service is offered in cooperation with a medical partner.

Location

- › Depending on the module, at the company or as agreed.

SWICA's Prevention Management unit aims to reduce absences, increase the potential for better health and improve the wellbeing of employees through health-related measures.

THERE FOR YOU, 24 HOURS A DAY, 365 DAYS A YEAR.
