

EMPLOYEE SURVEY

OCCUPATIONAL HEALTH MANAGEMENT FROM SWICA.

BECAUSE HEALTH
IS EVERYTHING

SWICA

Employee survey

Identifying the need for action and taking appropriate measures

Satisfied employees are the basis for long-term customer relationships and therefore play an important role in the success of companies. The employee survey is a strategic instrument for improving quality, performance and cooperation and for identifying the factors that need to be addressed in change processes. SWICA offers its customers various types of employee surveys that focus on work aspects such as development opportunities, workplace equipment, health promotion, leadership behaviour, cooperation with other departments, and internal communication. Companies then receive an analysis of the results, including recommendations for taking action in the area of occupational health management.
